

# Deforestation in Rondônia, Brazil (Antonio LaPlaca, 1003944869)

This map shows the extent of deforestation in Rondônia, Brazil, and the area that would be at risk of deforestation if a proposed road were built. About 45 percent of the area within 5.5 km of existing roads is deforested. Assuming a similar rate of deforestation, the proposed road would lead to about 616 sq. km of new deforestation.
